RE: Construction Completion and Certification Report for the Present Landfill (September 2005)

Dear Mr. Rampe:

The Colorado Department of Public Health and Environment and the Environmental Protection Agency have reviewed the Construction Certification Report for the Present Landfill. This report is signed by the Construction Quality Assurance Engineer, a registered professional engineer, and documents that this regulated unit has been closed in accordance with the approved closure plan (Present Landfill IM/IRA and accelerated action design documents). The report, therefore, meets the certification of closure requirements in 6 CCR 1007-3 §265.113 and is accepted. No additional construction is required for this accelerated action.

To complete the documentation of the accelerated action, some items need to be added to the Administrative Record. These items are specified on the enclosed list.

This Construction Certification Report is contained within the Closeout Report for the Present Landfill. Adequately addressing remaining comments on the Monitoring and Maintenance Plan, which will serve as the post-closure plan for the Present Landfill, will allow the Closeout Report to be approved.
